PROJECTS

GamZ+ | https://gamz2022.herokuapp.com/home | https://github.com/RJRHOU/BackEndProject   **May 2022**
• Worked with a team of three in the back-end development of a game catalog app creating a PostgresSQL database and using RAWG Video Game API, utilized CRUD endpoints allowing users to manipulate data on cards.
• Involved in SDLC and learned skills on manipulating the DOM through event listeners as well as advanced knowledge in Bootstrap.

Recall RADish | **https://github.com/RJRHOU/Capstone** | **July 2022**
• Worked in a group of two in my capstone project. We developed and app allowing the user to search recalled items from the SaferProducts.gov API using fetch. I focused on frontend, calling the API using React and Redux. We created a backend server using Express, Bcrypt, Sequelize and Winston. After pulling up a search on Bootstrap cards the user can utilize CRUD endpoints to manipulate the data.

PROFESSIONAL EXPERIENCE

Bolthouse Farms   **December 2020 – Current**
Field Service Representative

- Partner and build positive relationships with field store teams to drive profitability for both retail and wholesale.
- Maximized sales productivity while developing and motivating a strong sales specialist team, consisting of over 200 outlets in a $6 million territory.
- Successfully reversed downward business trend, after the first quarter in my position, to regain #1 selling position over our competition in the Houston market.
